PROJECTS

AI-Guided Campus Tour System — Developed an Android application integrating AI-powered image understanding and contextual narration for Meta smart glasses using Kotlin and Jetpack Compose. Designed wearable AI workflows and real-time contextual response systems.

Threat Intelligence in the Era of Generative AI — Researched prompt injection, agent-based attack vectors, natural language vulnerabilities, and defensive workflows for modern AI-enabled cybersecurity threats and LLM systems.

CineStar Recommendation & Classification System — Implemented machine learning models including KNN, Naive Bayes, and SVM for recommendation and classification tasks while evaluating clustering behavior and model performance.

DBMS Vision Model Evaluation — Benchmarked multiple AI models on DBMS-focused reasoning and question answering tasks across 800+ evaluations with comparative analysis and visualization reporting.

TECHNICAL SKILLS

Languages: Python, C++, Java, Kotlin, SQL, Bash, Assembly

AI/Data: PyTorch, Scikit-learn, NLP, RAG Pipelines, Vector Databases, Model Evaluation

Security: Wireshark, Nmap, Burp Suite, Threat Intelligence, Packet Analysis, AppSec

Development: Git, Linux, Docker/Podman, REST APIs, Jetpack Compose, SQLite

EXPERIENCE

OWASP Global AppSec USA Conference — Washington, D.C. Participated in cybersecurity workshops and industry sessions focused on prompt injection, authentication weaknesses, secure software design, AI security, and modern AppSec methodologies.

Threat Intelligence Research Collaboration — Worked on exploratory research involving generative AI security, agentic systems, adversarial prompting, and defensive analysis workflows.

EDUCATION

Missouri University of Science and Technology — B.S. Computer Science | Expected Graduation: 2026

Relevant Coursework: Artificial Intelligence, Natural Language Processing, Data Mining, Computer Security, Database Systems, Operating Systems, Computer Networks, Algorithms, Embedded Systems

ADDITIONAL INFORMATION

Focus Areas: Cybersecurity, Artificial Intelligence, Database Systems, AI Security

Experience with Linux environments, containerization, systems programming, networking, and model evaluation workflows.

Interested in AI security research, threat intelligence, agentic systems, and applied machine learning.
